Project title: Beagle Website

I'd like to have a single long page website. Starting with an intro about beagles then moving down the content bullet point topics. The more pictures of beagles the better because dogs make the world go round.

1. Intro-summary of the beagle (use the first chunk in Wikipedia page)
2. *History*
3. *Development of the modern breed*
4. *Appearance*
5. *Sense of smell*
6. *Variations-crossbreeds (pls put a picture of a puggle)*
7. If need more for website add '*temperament*' but don't add if it's already a lot

-At the end of the entire page link up Wikipedia page and cite it as source

-for all images just put citation below the image in small typeface

<https://en.wikipedia.org/wiki/Beagle>
